

Gaming Dashboard System

Prototype Dashboard Reference Guide

1. Dashboard Overview

The Gaming Dashboard is a unified analytics platform with 5 distinct sections providing comprehensive business intelligence across the organization. This prototype demonstrates the structure, metrics, and visualizations required for the production system.

Dashboard Sections

- **Executive Dashboard:** Strategic overview with high-level KPIs for leadership
- **CRM Dashboard:** Customer relationship metrics, cohort analysis, and player behavior
- **Acquisition Dashboard:** Marketing channel performance, campaign ROI, and customer acquisition cost
- **Product Dashboard:** Product vertical performance across Sports Betting, Casino, and Horse Racing
- **VIP Dashboard:** High-value player analytics, portfolio manager tracking, and VIP program performance

2. Currency System

Base Currency: ZAR (South African Rand)

All monetary values are stored and calculated in ZAR. The system displays values in the selected currency with real-time conversion for reporting purposes.

3. Executive Dashboard

High-level strategic metrics for leadership decision-making. Shows overall business performance across registrations, conversions, deposits, revenue, and player activity.

Primary KPIs

Metric	Definition
Registrations	Total number of new player accounts created during the period
FTDs	First Time Depositors - players who made their first deposit during the period

Conversion Rate	Percentage of registered players who made their first deposit. Calculation: $(FTDs \div Registrations) \times 100$
Active Players	Unique players who placed at least one bet during the period
Total Deposits	Sum of all player deposits (money added to accounts) during the period
Total Withdrawals	Sum of all player withdrawals (money taken out of accounts) during the period
GGR	Gross Gaming Revenue - total amount wagered minus total amount paid out to players. Calculation: Total Stakes - Total Payouts. Note: Can be negative when players win more than they wager
NGR	Net Gaming Revenue - revenue after deducting bonuses and adjustments. Calculation: $GGR - Bonuses - Adjustments$

4. CRM Dashboard

Customer relationship management metrics focusing on player behavior, value, and retention. Includes cohort analysis, demographics, payment methods, and bonus performance.

Key Metrics

Metric	Definition
Average Deposit Value	Average amount per deposit transaction. Calculation: $Total\ Deposits \div Number\ of\ Deposit\ Transactions$
LTV	Lifetime Value - total GGR generated by a player across their entire lifetime
Retention Rate	Percentage of players who return after their first session. Measured over specific time periods (7-day, 30-day, 90-day)
Churn Rate	Percentage of players who stop playing within a defined period. Calculation: $(Players\ who\ left \div Total\ Players\ at\ start) \times 100$
Cohort	Group of players who registered during the same time period (e.g., all players who joined in October 2025)

5. Acquisition Dashboard

Marketing performance tracking across all acquisition channels. Monitors campaign effectiveness, customer acquisition costs, and return on marketing investment.

Acquisition Channels

The dashboard tracks 5 primary acquisition channels:

- **Affiliates:** Partner websites driving traffic
- **Google Ads:** Paid search campaigns
- **Meta:** Facebook and Instagram advertising
- **Influencers:** Social media influencer partnerships
- **Organic:** Direct traffic, SEO, word-of-mouth (no paid acquisition cost)

Key Metrics

Metric	Definition
Marketing Spend	Total cost of marketing activities across all channels during the period
CPA	Cost Per Acquisition - cost to acquire one depositing player. Calculation: $\text{Marketing Spend} \div \text{FTDs}$
ROI	Return on Investment - revenue generated versus marketing cost. Calculation: $((\text{Revenue} - \text{Marketing Spend}) \div \text{Marketing Spend}) \times 100$. Expressed as percentage
Avg FTD Value	Average value of first deposit per channel. Calculation: $\text{Total First Deposits Value} \div \text{Number of FTDs}$

6. Product Dashboard

Performance analysis across three product verticals: Sports Betting, Casino, and Horse Racing. Each vertical is tracked independently with complete performance metrics.

Product Verticals

- **Sports Betting:** All sports wagering including pre-match and live betting
- **Casino:** Slots, table games, live dealer games
- **Horse Racing:** Race betting and exotic wagers

Metrics Per Product Vertical

Metric	Definition
--------	------------

GGR	Gross Gaming Revenue for this product vertical. Calculation: Stakes - Payouts for all bets in this product
Active Players	Unique players who placed at least one bet in this product vertical during the period
Turnover	Total amount staked by players in this product vertical (sum of all bet amounts)
Avg Bet Size	Average amount wagered per bet. Calculation: Total Turnover ÷ Number of Bets
Hold %	Hold percentage or house edge - percentage of turnover retained as GGR. Calculation: $(GGR \div Turnover) \times 100$. Higher percentage means better profitability

7. VIP Dashboard

Comprehensive analytics for high-value players. Tracks VIP program performance, portfolio manager effectiveness, player demographics, and behavioral patterns.

VIP-Specific Metrics

Metric	Definition
VIP Conversion Rate	Percentage of total players who achieve VIP status. Calculation: $(\text{Total VIPs} \div \text{Total Players}) \times 100$
Total VIPs	Total number of players currently holding VIP status (any tier)
Active VIPs	VIP players who placed at least one bet during the period
APD	Average Per Day - daily average NGR from VIP players. Calculation: $\text{Total VIP NGR} \div \text{Number of Days in Period}$
VIP Tiers	Classification levels: Diamond (highest), Platinum, Gold, Silver (entry level). Based on player value and activity

Portfolio Manager Tracking

VIP players are assigned to portfolio managers who manage relationships. The dashboard tracks performance per portfolio manager including:

- Number of VIP players managed
- Total deposits and turnover generated
- GGR and NGR contribution
- Average revenue per VIP in portfolio
- VIP tier distribution in portfolio
- Product vertical split for managed players

VIP Analytics Components

- **Revenue Trends:** 31-day trends for NGR, GGR, Turnover, Margin %, and APD
- **6-Month Performance:** Historical comparison of key metrics over 6 months
- **Demographics:** VIP lifecycle stage, age distribution, gender breakdown
- **Product Share:** VIP contribution by product vertical (Sports, Casino, Racing)
- **Top Players:** Top 20 VIPs ranked by turnover with tier classification
- **Activity Analysis:** Hourly activity patterns showing peak betting times
